Signed By: michael.k.sams@uscg.mil

Hi Nic,

I wanted to share below with you (and Steve); would like to get your feedback. I don't have a good TCEQ POC; not sure if they would appreciate this - or not.

Note: This is only a proposal; don't want folks to think it's official.

V/r,

Mike Sams

Subject: Harvey -- ESF-10 thoughts -- Request for TGLO feedback

Hi Jimmy,

I'm sharing below with you; would like to obtain your thoughts. I'll be discussing with reps from Sector CC, HG and MSU PA tomorrow morning. Thx!

Good Evening,

Some of you were already invited to participate on tomorrow's telcon. I know that you're all extremely busy. Pls join if at all possible. Myself and CAPT Mark Shepard will outline our proposed organization to deal with the ESF-10 mission. Our proposal is based on our primary goal of ensuring the USCG provides consistent ESF-10 support to the State of Texas; working closely with the EPA, TCEQ and TGLO. Given the uniqueness of Hurricane Harvey impacts (still not fully known) we believe there is value in adjusting our "normal" ESF-10 mission support delivery. Below is brief overview:

* Designate D8 staff member to serve as incident-specific FOSC for all

Hurricane Harvey ESF-10 mission within the State of Texas

- * That D8 FOSC would designate an incident-specific FOSCR to serve on his behalf for all Hurricane Harvey ESF-10 mission within the State of Texas (looking at Strike Team CO on ~21-day rotation - as necessary)
- * The FOSCR would be stationed with the EPA, TCEQ and TGLO personnel in a central location (initially being established in Corpus Christi; will look to move at some point)
- * A Branch would be established within each COTP zone (CC, HG and PA) to ensure adequate site assessment and mitigation within your respective COTP zone (aligned with TGLO regions)
- * D8 would manage overall FEMA accounting
- * Your respective COTP and predesignated FOSC would still be responsible for all non-Harvey ESF-10 mission pollution incidents within the coastal zone

Harvey has proven to be very challenging. Our structure must be adaptive and tailored for this particular hurricane response - to provide the most efficient response to the State of Texas

Pls give this some thought; I want to obtain your feedback.

V/r,

Mike Sams
